

BOARD LEVEL LEADERSHIP & RISK MANAGEMENT (RESIDENTIAL PROGRAM)

Background:

Role of the Board of Directors (BoD) is paramount in driving the Bank through right **Leadership vision and Risk Management** in order to maintain high standard of corporate governance, safeguarding the interest of the depositors and meeting the expectations of the stakeholders.

Leadership vision workshop is a critical investment for banks that want to achieve long-term success and ensure that all stakeholders are aligned and working towards the same goals. A shared vision enables directors to make informed decisions that are consistent with the bank's values and culture, and it provides a common language that directors can use to communicate with each other and other stakeholders.

At the same time, effective risk management is also critical for banks due to its highly regulated environment and subject to various risks such as credit, market, liquidity, operational, and reputational risks. Directors who receive risk management training are better equipped to understand the bank's risk profile and develop strategies to manage and mitigate risks effectively as the BODs have the ultimate responsibility for the risk management.

Therefore, risk management workshop helps directors to make informed decisions that safeguard the bank's financial stability and protect its stakeholders, including shareholders, customers, and employees.
