

Credit Risk Management at Branch Level

PRESENTS

Background

It is imperative for the banks to have a robust risk framework to manage all the risk associated with it and the management of credit risk begins at the origination itself. Managing the credit risk exposure within the framework of risk management (identification, measurement, monitoring and control) is of utmost importance for minimizing the losses arising out of the risks associated with credit.

Considering this, the course has been designed to provide the participants an understanding of Credit Risk Management at the Branch level.
