RETAIL LENDING Principles & Appraisal

Background

n

Bank and Financial Institutions have been giving extra focus in growing Retail/ Consumer Lending in the recent days as it contributes in diversifying the risks and enhancing the customer base. Due to comparatively low risk weight age on retail loans, exception a few products; retail loans have been enabling the BFIs to enhance more loans with the limited available capital, which has been further helping them to maximize profitability.

The related officers of BFIs can further maximize the sales, monitor the accounts more closely and avert the possible default risks if their skills are further honed. Taking this point into account, National Banking Institute has designed a customized Training on Retail Principles & Appraisal.
