# PROGRAM ON VERIFICATION OF CURRENCY & ID

The trade of counterfeit currency is a big challenge over the world and financial institutions are places where most of transaction takes place. But still some foreign currencies are not so familiar for bankers. Even they don't know how they look. The system applied in bank is just traced the currency number, customer phone number, keep the Xerox copies of passport and other travel documents. To produce fake passport along with counterfeit currency is trend for fraudsters. If we only follow those simple rules and forward these foreign currencies to central bank and then also to respective institution and finally got counterfeit. Then it will be big problem for banks. The session will address the knowledge about all currencies those are being circulated here and also idea to examine the passports. The key part of the session will be providing a booklet with images of currencies along with marking features and handling these practically with UV light and eye sight with sense of touch.
