

PRESENTS
**WORKSHOP ON BEHAVIORAL
INTERVIEWING**

What?

How?

Behavioral Interviews

Why?

Background:

Behavioural Interviewing Workshop is designed to bridge the gap between the theory of the Behavioral Event Interviewing (BEI) and the reality of life in the workplace where candidates come better prepared than interviewers.

By using the researched interviewing best practices, practical BEI tools and question funnels, managers can ensure a thorough interview and leave a lasting impression of professionalism on every candidate they interview.

Objectives:

- Understand the BEI Process of preparing, conducting and reviewing an interview to provide an optimized workforce that meet the business needs of your organization
- Save the cost of a bad hire, save time caused due to higher attrition and become an active front line business leader of the human capital agenda
- Master BEI skills and become a specialist in engaging BEI in the selection and assessment process

Apart from introducing interviewing tools and best practices, we will help you with:

- What you could have done to test the fudged or concealed information the candidate
- **Difficult interview scenarios presented by 'highly prepared' candidates**

Program Details:

Date: 26th & 27th November 2020

Time: 3:00pm to 6:15pm

Mode: Virtual Training via Zoom or Microsoft Team

Target Audience: HR, Line Manager, Authorities responsible for taking interviews.

Note: Organizations nominating 4 or more participants would receive Customized BEI Kit as implementation support
