

PRESENTS  
**UNLEASHING THE POWER OF EXCEL**  
**- A Tool for Increasing Productivity !**

### Background

Bankers have to deal with numbers whether while accepting cash or making payment of cheques or analysing the credit proposals or carrying out any other activities. In many areas the software installed by the BFIs helps the staffs to get their job quickly and accurately.

However, the BFIs cannot install software for every arithmetic calculation or any other activities, which have to be carried out by the staffs as it would not be doable practically and feasible economically.

The turnaround time can be slashed substantially, calculations can be done accurately, data can be analysed efficiently, record can be maintained effectively and many other activities can be carried out quickly and appropriately if skills of the staffs in using excel could be honed, which ultimately increases productivity, maximizes profitability and customer satisfaction.

Therefore, National Banking Institute has designed 2 days' Training on "Unleashing the Power of Excel" aiming to hone the skills of the staffs working in BFIs and other organizations so that they could increase their productivity and contribute in attaining the organizational goal.

Level	Assistant/ Officers/ Managers
