

WORKING CAPITAL ASSESSMENT AS PER NEPAL RASTRA BANK GUIDELINES

Background

National Banking Institute (NBI) is pleased to present a one day program on Working Capital Assessment as per NRB Guidelines facilitated by the industry expert practitioner along with the regulator.

Working capital loans are a vital source of financing for businesses to meet their day-to-day operational needs. Loan is an asset to any financial institution. A bank normally maintains more than 60% of its loan portfolio under working capital. That is why it is very much necessary to ensure that a working capital loan does not become bad as it is normally not secured by other collateral security. These types of loans are secured by current assets and that are in the possession of the borrower themselves.

The recent draft guidelines issued by NRB on working capital also explains the need for making the working capital lending more transparent and effective on its purpose and utilization.
