The yet another brand new fiscal year is at our doors now. Despite the April Earth Quake and its effect on last fiscal year and economic blockade the industry has yet again posted healthy financials and continued to grow. The trend is signalling the industry is maturing in its way of doing sustainable business, continue the growth, offer new products and services and develop its human capital.

JANBI:

At NBI we are very excited with our annual performance. We delivered 250 trainings nation wide reaching out to 7000 banking professional last year. We added many new programs including our flagship course JANBI. The first batch of JANBI rolled out in June creating history with 25 certified bankers for the first time in the history of Nepalese Banking industry.

JANBI certified bankers will continue to grow and this would lead to over all human capital quality of the industry. In next five years there would be hardly any bankers with out these certification and those who yet don't have JANBI will be left out due to knowledge deficit and career development amongst others.

The next exam date is December and registration is on going. Interested candidate could reach us at www.nbi.com.np

Monetary Policy and staff Training requirement:

Nepal Rastra Bank through recent Monetary Policy has required banks to set aside 3% of Total Employee Cost to staff trainings. This is a historic decision of the regulator which will pave the way for banks to create and maintain competent, qualified and forward looking human capital.

Digitisation:

The next wave of changes that will sweep the industry for better is digitisation. Banks taking pro active approach on digitisation is going to claim larger share of market as well as help grow the pie size. Customers will benefit through innovative products, efficient service and better banking environment.

With these thoughts wish all of you a happy Banking and look forward to welcome you in our programs.

Sincerely,

Sanjib Subba
Chief Executive Officer
